

# THREE PHASE REGULATING TRANSFORMER

Typical Outline Drawing of a Three Phase 41/55 MVA 72kv Voltage Regulator

## Three Phase Regulating Transformer

Partner Technologies Inc. manufactures three phase regulator transformers in a range of specifications to meet individual customer requirements. Our current size capacity includes three phase regulated loads up to 100 MVA at 72kV  $\pm 10\%$  350kV BIL.

### The Power of Partner Technologies

PTI began in 1989 as a small maintenance and repair shop. When PTI started manufacturing single phase distribution transformers, its expertise grew to the point of recognition as leading innovators of transformer technology.

Customers appreciate the opportunity to phone PTI's helpful staff to tap their knowledge of transformer technology. The responses are quick; the solutions, innovative.

Operating with the flexibility and resourcefulness of a small company, PTI's more than 100 employees are ready to take on the world! Registered to the current version of ISO 9001 and a registered patent, PTI is gaining the respect and business of international markets including the United States, Caribbean, South America, Europe and Africa.

Like its expertise and reputation for manufacturing high quality transformers, Partner Technologies continues to grow.
