difference

KRF SERIES THREE-PHASE RFI POWER LINE FILTERS OFFER EXCEPTIONAL EMI AND RFI PROTECTION. RFI FILTERS ARE INTEGRAL COMPONENTS IN POWER SYSTEMS UTILIZING DRIVES WHERE HIGH FREQUENCY NOISE SHOULD BE HELD TO A MINIMUM.

- Enhanced drive performance & durability
- Protection for sensitive electronic equipment susceptible to interference
- KRF series filters assist with compliance to EMC directives
- High common mode reduction in critical frequency range
- Interference from AC drives is reduced or eliminated

Features

- Advanced two-stage filtering design
- Lightweight and compact
- Tolerate 200% rated I for a minimum of 3 minutes

Electrical Specifications

- Three-phase
- 690V Class
- 8 to 2,500 Amps
