

FORM 6 RETRO-FIT CABINET

Form 6 Retro-Fit Control Beside a Form 4C Control

Low temperature cabinet built for installation in Alaska

The Power of Adaptability

Partner Technologies Form 6 Retro-Fit Cabinet allows customers to directly replace existing Form 3 or Form 4C Cooper Power Systems recloser controls using existing customer cables. No new wiring is required for installation.

The cabinet permits the use of Cooper Power Systems Form 6 Pole Mount Control.

The Power of Adaptability

The Form 6 Retro-Fit Cabinet is also available in a temperature-controlled cabinet, designed to operate at temperatures below -50° C. The insulated cabinet allows thermostat-controlled heaters to run on customer-supplied voltage.

The Power of Partner

Technologies PTI began in 1989 as a small maintenance and repair shop. When PTI started manufacturing single phase distribution transformers, its expertise grew to the point of recognition as leading innovators of transformer technology. Customers appreciate the opportunity to phone PTI's helpful

staff to tap their knowledge of transformer technology. The responses are quick; the solutions, innovative.

Operating with the flexibility and resourcefulness of a small company, PTI's more than 100 employees are ready to take on the world! Registered to the current version of ISO 9001 and a registered patent, PTI is gaining the respect and business of international markets, including the United States, Caribbean, South America, Europe and Africa.

Like its expertise and reputation for manufacturing high quality transformers, Partner Technologies continues to grow.
